

HardieFlex™ sheet

What is it?

A smooth, flat sheet that is painted on-site to create a flat panel look.

Where do you use it?

As an external wall cladding, eaves or soffit lining in residential single and medium-density homes, including alterations and additions, where a flat panel look is required. Ideal for full wrap or composite construction designs on either timber or light gauge steel framed homes.

What are the key benefits?

AFFORDABILITY. Fast installation involving only two trades helps make HardieFlex sheet one of the most cost-effective cladding solutions available.

DESIGN FLEXIBILITY. It's easy to achieve a range of looks with HardieFlex sheet using battens or Scyon™ Axent™ trim vertically over sheet joints, as bold or subtle highlights over their smooth, flat surface.

FAST INSTALLATION. HardieFlex sheet is lightweight and its square edges, together with the wide range of James Hardie™ accessories, make it easy and fast to install by tradespeople, owner-builders and renovators.

VERSATILITY. 6mm HardieFlex base sheet can also be used as bracing.*

SECURITY. HardieFlex sheet is resistant to damage from termites, rot and fire.**
