## Steel Pelmet System

By EZ Concept®

A simple to install two-piece pelmet system  
that cleverly conceals blind tracks

# EzyPelmet® Steel Pelmet System

Adding a new dimension to the internal perimeter of square-set interiors, EzyPelmet® is a two-piece steel pelmet system that conceals unsightly window furnishing tracks and rolls.

EzyPelmet offers a simple and discrete transition between the interior ceiling and external windows, curtain wall facades or the building structure. The system cleverly conceals feature lighting and opens vast panoramas before your eyes. Using a two-piece steel pelmet box eliminates the risks involved with traditional pelmet systems made from MDF and plasterboard, which require a lengthy install process, additional fixings and extra finishing considerations when it comes to plastering and painting. Because EzyPelmet is made from cold rolled steel it maintains form and will not crack or distort over time and can be painted with the ceiling due to its pre-finished surface. Available in zinc or white.

## Features & Benefits

### Custom Made

To suit your requirements

### Pre-finished Surface

Colourbond or Zinc finish available

### Fast Install

Saves time

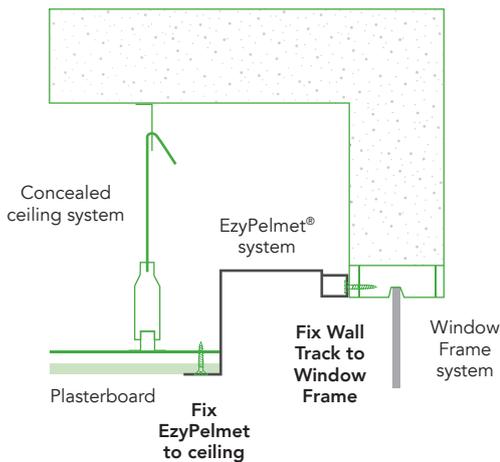

### Economical

Money saving solution

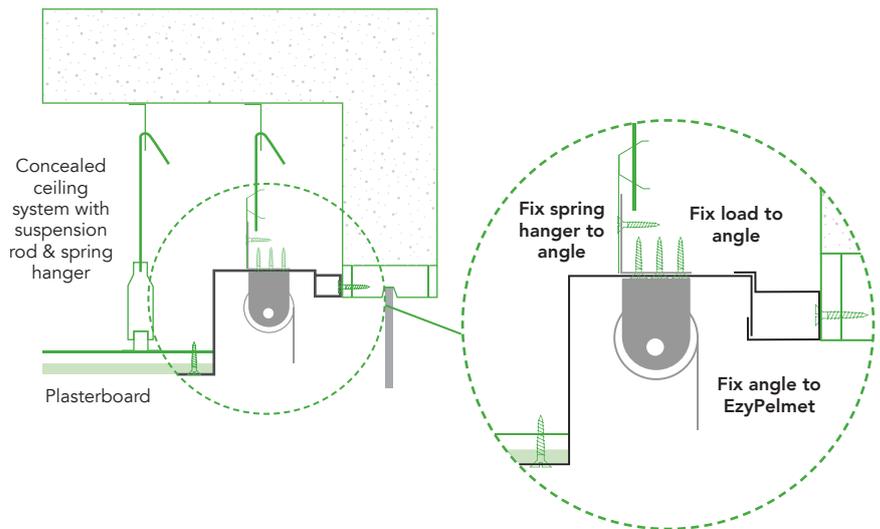

### Maintains Form

Without cracking or distorting over time

## Standard Fixing Detail

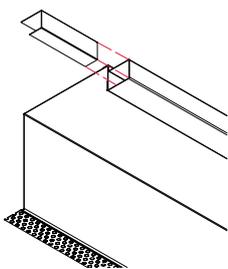

## Load Bearing Fixing Detail

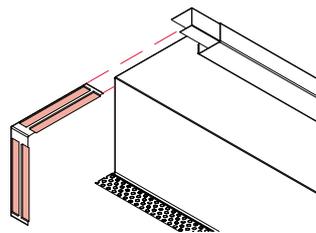

## Joining Instructions

For more information visit [www.adxdepot.com.au](http://www.adxdepot.com.au)

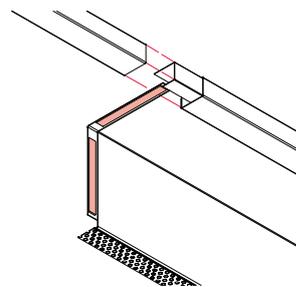

Step 1

Add Track Joiner to Wall Track

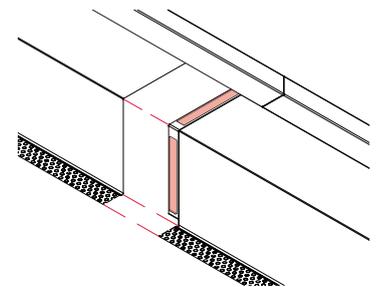

Step 2

Stick Main Joiner to EzyPelmet with tape (3m VHB Tape 4910 12x1.0mm or equivalent - 4 places)

Step 3

Add Wall Track to Track Joiner

Step 4

Add EzyPelmet to Main Joiner
