WALL & SCREEN INSTALLATION INSTRUCTIONS

Everything you need from start to finish

Austratus offers so much more than head-turning style.

Our patent-pending fitting system allows continuous lengths of timber to be simply and easily screwed directly onto existing walls.

- **Complete, off-the-shelf system** including hanging rods, clips, rails and selected timber profiles.

- **A seamless finish.** For added convenience, Austratus also supplies specially-engineered finishing trims and spacers.

- **A system that's engineered to stringent quality standards**.

Six easy steps

Step 1.

Fix rails up to 600mm apart.

Step 2.

Place plastic clips and spacers (if required) into the rails.
Step 3.

If required, fix locators to end-join timber lengths (acts as a sleeve).
Step 4.

If the profiles are running vertically, the locators will prevent the profiles slipping down when fixed above the clip.

Installation tips

Step 5.

Now begin to insert your timber lengths, simply push the timber into the clips.

Step 6.

Once all timber lengths are in place, if the rail ends are exposed. Insert the end caps.

There you have it – fast, easy & simple.

1. If you require speakers, lights, air vents or any other special features, the timber is easy to cut and remove. Austratus also supplies tins of touch-up coating to restore coated finishes to the end grain.

2. Austratus has a natural acoustic rating, which can be further enhanced to suit various application requirements, with the addition of acoustic insulation. Simply cut the insulation to the required shape and size, then lay it on top of the timber profiles. Technical information is available on request.

Austratus

A CEDAR SALES INNOVATION

An innovation from 30-year timber veteran Cedar Sales

Austratus is a product innovation from architectural timber specialists, Cedar Sales. With more than 30 years experience supplying Western Red Cedar and Hemlock to residential and commercial projects across Australia, Cedar Sales has developed a reputation for innovative product designs, uncompromising quality control and an unwavering commitment to sustainability. Our latest innovation, Austratus, is a state-of-the-art, modular system making slatted timber ceilings, walls and screens easier – and more accessible – than ever.
