METINNO®

Access Panels

The Metinno range of set bead and flanged access panels have been designed and rigorously tested to meet the requirements of the Building Code standards for both domestic and commercial applications within Australia and New Zealand. Suitable for internal installation in both stud and masonry walls, suspended ceilings and service shafts, Metinno Access Panels are constructed with quality components within its premium sound reduction design.

Features and Benefits:

- Premium sound reducing design.
- 16mm high density moisture resistant door.
- Fully welded aluminium construction.
- Ideal for walls, ceilings and service shafts.
- Square drive lock for security.
- Adjustable cabinet hinge.
- Thread inserts for independent suspension.
- Quick release safety chain.

METINNO® Access Panels
Premium Flanged & Set Bead

Subtly frame or completely conceal a sturdy, secure access point

Achieving a high acoustic rating of RW32, the Metinno Access Panels have a rigid welded-aluminium construction and are finished with a 16mm galvanised steel-lined door which is high density moisture resistant, making them a perfect solution for any high-humidity space.
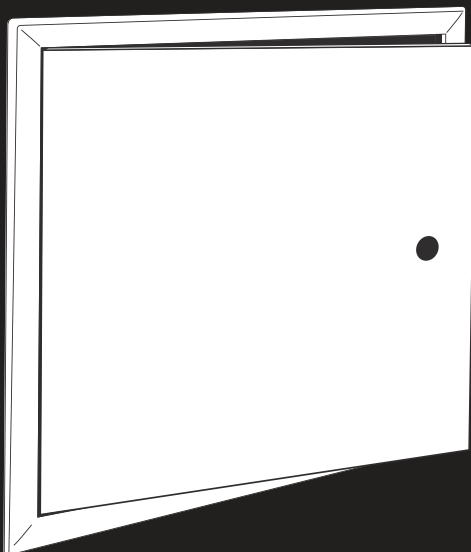

High quality components have been utilised right down to smaller design features like side fixing clips, rubber seals contributing to the acoustic requirements and square drive key lock and safety chain for increased security requirements.

Metinno Access Panels are available in a flanged or set bead finish across a variety of standard sizes and have integrated threaded screw holes enabling independent installation points perfect for suspended ceilings.

For the best finish and results on your project, specify Metinno Access Panels.

Flanged Access Panel

Features a thin, visible frame that is fast to install. Avoid extra install steps and achieve a tidy finish.

Set Bead Access Panel

Flush with the ceiling or wall, achieve visible perfection with a seamless finish throughout your project.

Premium Flanged Access Panel

- Framed access point for walls, ceilings and service shafts.
- Lock for security.
- Sound reducing design.
- Range of sizes available.
