METINNO®

Aluminium Skirting

Adding style and durability, Metinno Aluminium Skirting maintains a quality finish.

The aluminium skirting range ensures quality is achieved and maintained throughout all spaces, right down to small details. With a variety of finishes to select from, the skirting is available in two standard heights but can be cut down or guillotined to a desired size.

Features and Benefits:

· Tough surface for office conditions.
· Natural anodised finish so no painting required.
· Variety of fixing methods to suit any application.
· Can be powder coated or painted to suit decor.

METINNO®

## SM95 | 95mm Shadowmax Skirting

The SM95 profile has been designed to give perfect parallel lines and reduce installation time where a 10mm shadowline is required. The aluminium skirting is used to achieve a modern and contemporary appearance.

- Creates a resilient aluminium skirting with a 10mm shadowline that is flush to the wall.
- Meets the challenges that existing metal shadowline trims can't fulfil.
- Gives a consistent line that is straight and true.
- Simple and easy installation.
- System includes: External corner joiners, straight joiners for sections longer than 4800mm and stud clips to secure base firmly.
- Improved end result.
- Chromated to provide key for surface painting.
- Designed to compliment the ShadowMax Jamb.

Section	Mill Finish (Chromated) Available Length (m)
SM95	4.8

SM135 | 135mm Shadowmax Skirting
